Bakir Khalid

Backend-Focused Full-Stack Developer

+964 772 751 9662 | bakir1998bt.bk@gmail.com | linkedin.com/in/bakir-sobashy-aa6536378 | github.com/bakirsobashy | Baghdad, Iraq

PROFESSIONAL SUMMARY

Backend-focused full-stack developer with 1+ year of production experience building **Node.js/Express REST APIs on PostgreSQL**, deploying them to **AWS EC2 behind Nginx**, and shipping React/Next.js and React Native front ends. Maintains APIs that handle **10,000+ daily requests at 99.5% uptime**, and published **Budgi**, an offline-first personal finance app, on Google Play. Moved into software from pharmacy through Harvard's CS50 and full-stack bootcamps.

CORE COMPETENCIES

Node.js & Express REST APIs • PostgreSQL & MongoDB • React & Next.js • React Native & Expo • AWS EC2 | Nginx | PM2 • JWT Auth & Role-Based Access • Docker • Offline-First Apps (SQLite)

WORK EXPERIENCE

Al Buraq Development Studio Sep 2025 - Present

Junior Backend Software Developer *Remote*

- Develop and maintain RESTful APIs in Node.js and Express backed by PostgreSQL, handling **10,000+ daily requests** with **99.5% uptime**.
- Deploy and configure production server infrastructure on AWS EC2 with Nginx reverse proxy, SSL termination and PM2 process management; coordinate tasks through Jira and Trello.
- Lead programmer for game development in GDScript on the Godot Engine; participated in several game jams.

PROJECTS

Budgi - Personal Finance Android App *Live on Google Play*

Designed, built and launched a free personal finance Android app that lets users track income, expenses and monthly budgets entirely offline. Offline-first Expo app with SQLite and Drizzle ORM for local data persistence and a React Native UI, featuring custom spending categories, monthly and per-category budget limits, and progress bars showing the remaining budget.

React Native, TypeScript, Expo, SQLite, Drizzle ORM

Inventory Control - Role-Based Inventory Management Web App *Freelance client project*

Designed and implemented a full-stack application to track products, storage locations and stock transactions, part of a full-stack inventory system developed in cooperation with the Iraqi Ministry of Health (MOH). Built a secure RESTful backend with JWT authentication and a responsive Next.js frontend, supporting role-based access for **50+ daily active users** across multiple inventory locations.

Node.js, Next.js, PostgreSQL, JWT, AWS

G3 Store - E-Commerce Website

Built a full-stack online store with modular REST endpoints designed for scalability and security: secure user registration and login with JWT authentication, product management, shopping cart operations and order processing.

Node.js, Express.js, MongoDB, JWT, WhatsApp API

EDUCATION

Bachelor's Degree in Pharmacy *Al Zaytoonah University* 2016 - 2021

COURSES & CERTIFICATIONS

CS50: Introduction to Computer Science *Harvard University*

Node.js, Express, MongoDB & More: The Complete Bootcamp *Udemy*

The Ultimate React Course 2025: React, Next.js, Redux & More *Udemy*

The Complete JavaScript Course 2025: From Zero to Expert *Udemy*

JavaScript Data Structures & Algorithms + LeetCode Exercises *Udemy*

100 Days of Code: The Complete Python Pro Bootcamp *Udemy*

SKILLS

Backend: Node.js, Express.js, REST APIs, JWT authentication, role-based access control, Nginx

Frontend: React, Next.js, Tailwind CSS

Mobile / Cross-Platform: React Native, Expo, Jetpack Compose

Programming Languages: JavaScript, TypeScript, Python, SQL, C#, GDScript

Databases & ORMs: PostgreSQL, MongoDB, MySQL, SQLite, Redis, Drizzle ORM

Cloud, DevOps & Tools: AWS (EC2), Docker, Nginx, PM2, SSL termination, Git, Jira, Trello

Game Development: Godot Engine, GDScript

Spoken Languages: Arabic (native), English (professional working proficiency)
